PLC, Radio and Antenna Replacement Project

In November of 2024, the Board awarded Wagner Electric the PLC, Radio and Antenna Replacement Project. This project was funded using ARPA Funds from Shasta County as well as Capital Improvement Reserves. The project included the replacement of all telemetry-related components at seven sites located throughout the District. PACE Engineering was authorized to provide design, programming and functional acceptance testing.

At the March 18th, 2026 Board Meeting, the Board unanimously accepted the completed project and authorized the District Manager to issue the Notice of Completion.

District Receives 100% Allocation For 2026/2027 Water Year

With reservoir storage remaining stronger than average due to recent wet years and active water management efforts, the Bureau of Reclamation announced that the District will receive 100% of their water allocation for the 2026/2027 water year. Water supply allocations are based on an estimate of water available for delivery and reflect current reservoir storage, precipitation and snowpack.

With the District receiving 100% of their allocation, this water year will be used in the Bureau's calculations when determining how much water Centerville CSD will receive in a future drought. Drought allocations are based upon a three-year water use average when there is no drought present.

This is a great year to plant a garden!

Need a burn permit? Visit the CalFire website at https://burnpermit.fire.ca.gov. Complete the online application. Once submitted, you will receive an approval or denial via email. You can call the Burn Day Number 530-224-8777 or 1-800-411-8728 after 9 am for current burn day information.

Do You Have Defensible Space?

Are you prepared for fire season?

With spring arriving early, fire season will be here before we know it.

Creating defensible space is essential to improve your home's chance of surviving a wildfire. It's the buffer you create between a building on your property and the grass, trees, shrubs or any wildland area that surround it. This space is needed to slow or stop the spread of wildfire and it protects your home from catching fire – either from direct flame contact or radiant heat. Defensible space is also important for the protection of the firefighters defending your home.

Two Zones Make Up the Required 100 feet of Defensible Space:

ZONE 1: 30 feet of Lean, Clean & Green

Remove all dead plants, grass and weeds.

Remove dead or dry leaves and pine needles from your yard, roof and rain gutters.

Keep tree branches 10 feet away from your chimney and other trees.

ZONE 2: 30–100 feet of Reduced Fuel

Cut or mow annual grass down to a maximum height of 4 inches.

Create horizontal spacing between shrubs and trees.

Create vertical spacing between grass, shrubs and trees. **Use Equipment Properly to Keep from Sparking a Wildfire**

Mow before 10 a.m., and never on a hot or windy day.

String trimmers are a safer option (vs. lawnmowers) for clearing vegetation.

Scheduled Board Meetings:

The next scheduled Board of Director's Meeting will be held Wednesday, April 15th at 7:00 pm, at the District Office.

The public is always welcome.

Average Water Usage

Compare the usage on your water bill with the average of the District.

March's Average: 2,200 cubic - feet.
