# The Value of Our Water...

## Distribution System...

Did you know that the District was formed in 1959? With some of the original infrastructure now at 60 years old, it is approaching its useful service life. With that said, it will be necessary to plan for its replacement sometime within the next 15 years.

To ensure we have a reliable water system we must plan ahead for the replacement of old infrastructure as well as prepare for future demands. This is all done while continuing to provide a reliable and adequate supply of high quality water at the lowest reasonable price, in an environmentally responsible manner to each of our customers.

## Pressure Zones...

Were you aware that the District operates and maintains six separate pressure zones which include five booster pump stations? Each of these components in our District require regular testing and maintenance. The Booster Pump Stations are needed to ensure water flow to our higher elevations as well as to meet peak and emergency demands. Do you know which pressure zone you live in? Listed below are the different zones and their approximate locations:

**Zone A** is located primarily in the upper reaches of the Ranchland Subdivision including parts of Mountain Shadows Drive and Landmark Circle.

**Zone A1** is currently the highest elevation which includes both Ledgewood Drive and parts of the Middletown Park area.

**Zone B** is considered to be the largest zone in the District and is located generally along Placer Road from the Muletown Road area to Towerview Circle.

**Zone C** serves the area along both sides of Placer Road from Towerview Circle to approximately Record Lane and includes areas in the vicinity of Boston Avenue.

**Zone D** covers the southern and eastern portions of the District which includes Chaparral, Power Line Road, Canto De Las Lupine and Clear Creek Road. Pressures to this area are controlled by three pressure-reducing stations.

**Muletown** - This is an isolated zone on Muletown Road. This zone is served directly from the Muletown Conduit and has no tank storage.

Annual Art Auction  
&  
Appreciation Dinner*

*Saturday, February 9th 2019 at 6 pm  
Win-River Event Center  
2100 Redding Rancheria Road*

The Centerville Education Foundation (CEF) needs your help! CEF is a non-profit organization that helps fund advanced educational needs for Grant School. 100% of their resources support the Grant School students and teachers.

Last school year CEF donated over \$22,500 towards Science, Technology, Engineering, Art & Mathematics learning; \$8,450 towards Odyssey of the Mind and gave \$500 in scholarship awards to students.

**PLEASE JOIN US AT OUR SINGLE FUNDRAISING EVENT.**

If you are a business owner or know of a business that would be able to donate to our silent auction, please contact Lori Meadows at CEFGrant530@gmail.com.

You can purchase your tickets at Grant School's main office or at [www.auctria.com/auction/CEFDinner](http://www.auctria.com/auction/CEFDinner)

**Presale tickets are \$35 or \$40 at the door**

Purchase an entire table for a discounted price on our website.

 **History of Grant School . . .**

To understand the history of Grant School, you must go back to the mid 1950's. During the gold mining days, many people settled in mining towns around Shasta County. Three schools were started at Horsetown, Texas Springs and Middletown. Together they made up the Centerville School District, so named because the area was in the center of the Clear Creek Mining District. As gold mining in Shasta County declined, the three schools were consolidated into one school... The Centerville School. The school was located at Texas Springs and Placer Road where the Grange Hall is now situated.

*Stay tuned for more Grant School History next month...*

**SCHEDULED BOARD MEETINGS:**

The next scheduled Board of Director's Meeting will be held Wednesday, February 20th at 7:00 pm, at the District Office.

**The public is always welcome.**

**Average Water Usage**

*Compare the usage on your water bill with the average of the District.*

*January's Average: 1,600 cubic -feet.*
